Dated: 16th November 2023

Subject: Regarding attendance of students going for Leadership Development camp at Ranoli, Kulu w.e.T 19th Nov. to 24th Nov. 2023.

Respected Sir,

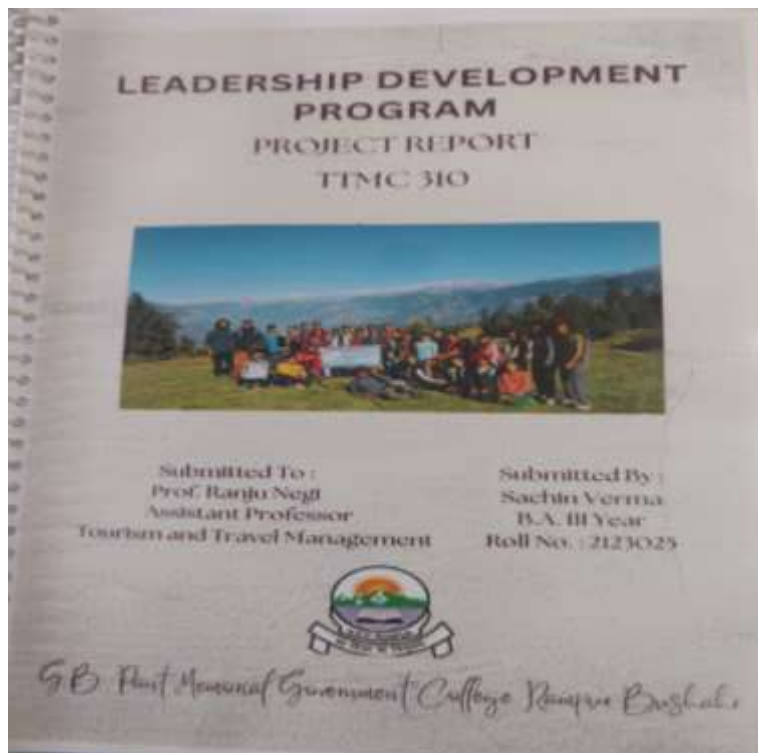

With due respect it is submitted that the Department of Tourism and Travel Management is going to organize "Leadership Development Camp" at Himalayan Vagabond adventure Camp Ranoli, Kulu w.e.T 19th Nov to 24th Nov 2023. Total 31 students (BA 2nd & 3rd SEM and BA 2nd year Major) will be participating in this camp. As this camp is a part of their curriculum and it will definitely offer a valuable opportunity for students to enhance their leadership skills and gain practical experience in the field.

Therefore, I request your goodness to look after the attendance of the following students.

Thanking you in anticipation,

Yours faithfully,
Ranjan Negi
Assistant Professor
Tourism and Travel Management.

4. Industrial visits

4.1. Department of Commerce

**A Report on Industrial Tour
Day 3 (21/05/2014)**

The third and last day of our tour was about finishing, training and getting the idea that from we visited World famous Bhakra Industries or Kalyan at around 10:00 AM. The visit commenced with the warm welcome from the company representatives who showed us to the industry & a cooperative society which was established in 1984 by Late Mahatma Jai Ram. Bhakra people of Bhakra village in Kalyan, had experience in handloom work, hence this industry started Bhakra after the name of Bhakra village. There were only 10 members in Bhakra industry when it started. The company representatives told us that industry production is done in Bhakra is done through local weavers only based on local art and culture. All the productions in the Bhakra is handmade, they do not use machines at all. They use the raw materials from looms after getting the quality standards of the materials in their looms through high-tech machines. Two months already, they use their Artificial Machine used which they purchase from the Japanese Group of India, Kolkata.

We visited their laboratory to see and know the process to check the quality of threads as per their parameters. We had an interaction with the company representative and General Manager, who told us that their yearly turnover is about 11 to 14 crores and currently Bhakra industry is providing employment to more than 1000 local families. According to them they have provided houses to needy weavers. After that we visited the production site, there we observed that the workers are given very good facilities, like seating, ventilation and cleaning. During the visit we had nice interactions with their representatives and they answered our every questions to clear our many doubts especially with respect to the challenges etc.

As per them, Lack of Awareness among the people to differentiate the Handloom Products with power loom products, is the major challenge they are facing. Since power loom products are cheap, inferior quality and available at very low prices in the market since a day, so many people are going to buy these products. However, the government have implemented measures to certify the Handloom products of the brands like Bhakra with some certified marks to distinguish it from power loom products, but a significant portion of consumers are unaware of these things. Overall, we came to the conclusion that Bhakra industry in Kalyan are not only providing the good quality products at reasonable prices, but they are providing employment to many people and also ensuring to preserve local art, culture and values which is really a remarkable.

After this visit and having lunch on the way near Bhakra, we reached to town Himalayan National which is located in Banjar sub-division of Kalyan in the state of MP. The Park was established in 1984 and is spread over an area of 1171 km. The GNHP is a habitat to numerous flora and more than 275 fauna species including 51 mammals, 181 birds, 1 reptile, 9 amphibians and 227 insects. It was awarded UNESCO world heritage site status in 2014, in recognition of its outstanding significance. Biodiversity conservation. There also we have healthy interaction with the officials of the park who told us the importance of this park and advised us to contribute to preserve and protect nature in our life. Due to lack of time we couldn't able to explore everything but anyways, we could able to visit for about 1 km inside the GNHP.

After visiting GNHP, we visited to Jhila waterfall at around 1:00 PM. It is located near Banjar town of Kalyan district. There, we spent the time for about 1 hr and taking pictures. We took some photographs there and returned towards Jhila Park to my hotel in Banjar. Jhila Park is situated at an altitude of 10,500 ft above sea level. It is famous for around 12 km from 1800, Jhila park shows an impressive high altitude scenery and mountains. After exploring Jhila park, we headed back to Banjar and on the way, we had dinner in Hotel and reached Banjar at around 12:30 in the next night.

The Industrial Visit to Kalyan was an excellent and rewarding experience. We have been able to understand the working of an industry and explored many business ideas. We thank our Principal Sir, Dr. Pankaj Shrivastava (I) and Head of the Dept. of U.T. Sir, for his providing us to visit these places. We thank to Prof. Jitendra Singh, Dr. S. K. Singh and Dr. Hema Shree for planning and executing this visit and also for spending time with us only just yesterday. It was really a great management by our faculty members and their guidance during the tour was invaluable. We are really very grateful for giving chance to explore, discover and create something together. At last, I also want to thank each and every student who was the main part of this tour and also want to extend best wishes to Prof. Jitendra.

At last, once again Thankyou everyone who directly or indirectly supported us for this tour including OBTU.

Thank You

Aashu

Subject: Application for the provision and financial assistance
for educational trip/Field work.

Respected Sir,

With due respect we beg to say that with the contents of Department of Life Science & Zoology are educational trip to Jaisalmer Desert Safari in Rajasthan state. As you know the the Great Sand Dunes like forest in Tehsil Wildlife Sanctuary, which comes under the protection under Wildlife Protection Act, 1972.

Other than that this region is included by the Ashok Mithalayan National Park.

The educational trip provides a valuable opportunity for us to enhance our scientific knowledge and gain practical experience that is directly related to our Curriculum.

Educational trip does not include Transportation, Food etc. So we are requesting financial assistance to help cover our expenses. So, kindly grant us permission & allowance. We shall be extremely grateful to you for our great set of facilities.

Thanking You
Students of Department of Life Science

Educational Field Trip Report

(Zoology department)

Location: Jalori Pass (Serolsar Lake)
Date of Visit :22 May 2024
Report Submission Date: 4 July 2024

Purpose of visit

Biodiversity Assessment: Studying the diversity of plant and animal species in the Serolsar area, identifying any endangered or endemic species.

Ecosystem Health Evaluation: Assessing the overall health of the ecosystem by examining factors such as water quality, soil condition, and habitat integrity.

Environmental Monitoring: Implementing monitoring protocols to track changes in environmental parameters over time, such as temperature, precipitation, and air quality.

Conservation Initiatives: Engaging in conservation activities like habitat restoration, invasive species management, or wildlife protection to mitigate human impact and preserve Serolsar's ecological balance.

Lathraea squamaria (Common Toothwort)

Habitat: Lathraea squamaria is found in woodlands and shady places. It often grows on the roots of trees and shrubs, particularly hazel, alder, and elm.

Appearance : Lathraea squamaria lacks chlorophyll, so it does not have green leaves. It has a distinctive pink, purple, or whitish coloration.

Rhododendron (Buransh)

Habitat: Rhododendron arboreum is found in a variety of habitats, including forests, scrublands, and alpine regions, often at elevations ranging from 1,200 to 3,600 meters above sea level.

Cultural significance: In many regions where it is native, Rhododendron arboreum holds cultural significance. It is the national flower of Nepal and the state flower of both Nagaland and Uttarakhand in India.
